

Deployment Confirmation Report — Cryogenic Material Dashboard v0.4.9

Date: 2026-05-18
Repository: GBOGEB/document-organization-system
GitHub Pages Base: <https://gbogeb.github.io/document-organization-system/>

Release Summary

Version 0.4.9 delivers three major improvements:

- 1. **SSOT System Integration** — Single Source of Truth launcher, slides, and metadata fully integrated with the main dashboard.
- 2. **NIST Parity Regression Suite** — 766 tests validating all 10 materials against independent NIST equation implementations.
- 3. **evalRational() Bug Fix** — Corrected `sqrt(T)` -based 9-coefficient rational model in SSOT HTML files.

cryo_dashboard_ssot/ Duplicate Bundle — Resolution

The `/cryo_dashboard_ssot/` directory referenced in earlier planning documents **does not exist** in the repository. The SSOT files (`ssot.json` , `ssot_launcher.html` , `index_slides.html`) live exclusively within the canonical `cryo_dashboard_v0_3_0/cryo_dashboard_v0_3_0/` subtree. No duplicate bundle exists, and no cleanup action was required.
