

# CDN Version Pinning — Cryogenic Material Dashboard v0.4.9

Locked: 2026-05-18

## Pinned Libraries

| Library   | Version | CDN URL                                                    | Used In                                                                                                 |
|-----------|---------|------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| Plotly.js | 2.35.2  | <code>https://cdn.plot.ly/plotly-2.35.2.min.js</code>      | <code>dash-board_modular.html</code> , <code>ssot_launcher.html</code> , <code>index_slides.html</code> |
| Reveal.js | 4.6.1   | <code>https://cdn.jsdelivr.net/npm/reveal.js@4.6.1/</code> | <code>index_slides.html</code>                                                                          |

## Why Pin?

- **Reproducibility:** Charts and slides render identically across deployments.
- **No surprise breakage:** CDN updates won't silently change behavior.
- **Audit trail:** Each version bump is a deliberate, tested decision.

## Updating CDN Versions

1. Test the new version locally with `npm test` and manual chart inspection.
2. Update all HTML files referencing the library.
3. Update this document.
4. Bump dashboard version in `package.json` and `VERSION` .

## Previous Versions

| Date       | Plotly.js               | Reveal.js | Notes                                |
|------------|-------------------------|-----------|--------------------------------------|
| Pre-v0.4.9 | Mixed (2.27.0 / 2.35.2) | 4.6.1     | Inconsistent across files            |
| 2026-05-18 | 2.35.2                  | 4.6.1     | Standardized across all entry points |
